

WORKSTATION HYGIENE

Incident Date: March 18, 2020

Location: All Operations

Incident Type: Hazard Mitigation

Summary:

It is critical that we all do our part in preventing the transmission of spreadable illnesses and viruses such as COVID-19. The following is a guide to help keep your work stations and high-touch areas clean and disinfected.

How To Clean

- Wear gloves when cleaning
- If surface is visibly soiled it should be cleaned prior to being disinfected
- Use EPA approved cleaning solutions
- Do not pour liquid on any part of a machine
- Spray cleaning solutions onto clean towel or rag
- Wipe down listed areas
- Do no mix chemicals
- Discard rag when cleanup is complete or when rag becomes soiled

Mobile Equipment

Areas to clean:

- Steering wheel
- Control buttons and levers
- Seatbelt
- Hand brakes
- Mirrors
- Door handles

Machine Centers

Areas to clean:

- Door handles
- Buttons and switches
- HMI Screens
- VHF radio controls
