Making safety a priority

The BC Forest Safety Council salutes the 456 forestry organizations that earned SAFE Certification in 2007

BC Forest Safety Council

PROGRESS REPORT 2007-08

Delivering on our safety commitment

CO-CHAIRS' MESSAGE

Given all of the challenges that we currently face in forestry, there is much talk about where the industry is going and what it will look like in the coming years. While we all know that there are going to be important and difficult adjustments, we believe that we emerge as a strong and dynamic sector, and that our efforts to improve safety will be an important part of our future. Industry was given the challenge in 2005 to improve our safety performance and industry is responding at every level.

The Council had a productive 2007, moving from planning forest safety programs to working with companies and workers to make them on-the-ground realities.

Forestry operations across our province worked hard at putting effective safety programs in place, and many people throughout the sector completed training intended to see them home safely every day.

This sector-wide commitment has resulted in significant reductions in injuries and costs. The latest figures, released last summer, show reductions in the number of injured forest workers and this has resulted in less

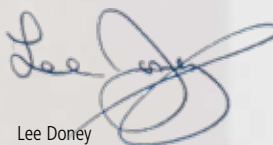

being spent on in compensation costs for 2006. When compared to 2005, the trends in every category are showing improvements with fewer lost days, fewer claims, fewer serious injuries, fewer fatalities and reduced costs.

We are now starting to realize the benefits of industry's efforts and our strong partnerships with WorkSafeBC and the Ministry of Forests and Range.

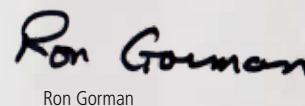

This report outlines the Council's role in that partnership, our results to date and how we plan to move forward in 2008.

Yes, we still have a long way to go. Reaching our goal to eliminate fatalities and serious injuries is going to require more work. But we have made major progress that is a credit to the sector, our workers and the province.

Forestry has a bright future in BC. Our job — our commitment — is to see that it's also a safe and healthy one.

Lee Doney

Forestry fatalities

UNACCEPTABLE LOSS

Sixteen workers in B.C.'s forest industry died on the job in 2007, four more than the year before. (These figures don't include forestry fatalities outside the jurisdiction of WorkSafeBC.)

Compared to the 43 fatalities of 2005, the last two years may seem an improvement. But there is no acceptable number. With industry support, the Council strives to end forestry deaths, and we pay tribute to those lost in 2007.

JANUARY

Keith Graffunder died January 20 at Clearwater

Ralph Hauber died January 20 at Dawson Creek

FEBRUARY

Frank Wilson died February 3 at Gillford Island

MARCH

Merrill Dickson died March 21 at Jervis Inlet

APRIL

Warren Sinclair died April 2 at Port Alberni

Kevin Scott Wriglesworth died April 3
at Greenville

Dave Valleau died April 26 at Pemberton

MAY

Dale Malberg died May 26 at Adams Lake

JUNE

Bryan Valleau died June 21 at Squamish

JULY

Holger Bauer died July 19 at Quesnel

AUGUST

Darren Erickson died August 1 at Wycliffe

Francis Tucker died August 12 at Merritt

SEPTEMBER

Benjamin Arthur Buchi died September 10
at Bear Lake

Eric Leischner died September 14 at Hope

OCTOBER

Cody Davies died October 15 at Adams Lake

Barb Toner died October 17 at Houston

Safer drivers, vehicles and roads

FORESTRY TRUCKSAFE 2007

Far fewer forestry-related crashes, injuries and fatalities are this program's goals, and we pursue them with initiatives that promote safe drivers, safe vehicles and safer roads.

Contributing to the Council's overall effort to foster a culture of safety, last year's Forestry TruckSafe activities included:

- > Advocacy and outreach, including meetings with log haulers and other forestry drivers across the province and participating in tail gate meetings, crew talks and industry conferences.
- > Information and education, including *Share the Road* radio announcements, magazine articles and our bi-weekly *Rumblings* newsletter.
- > Road use management support, including participation in federal-provincial groups such as those working to improve standards for steep-slope hauling and resource road radio use.

In all this, we benefit from strong working relationships with the organizations that make up the Council. They serve their constituencies by acting as conduits for our road safety resources and information. Sometimes, these groups partner with us in developing those materials.

The fundamental element of Forestry TruckSafe is that it is an identifiable point of contact for concerns, input, up-to-date information or referral to other sources for people who want individualized, practical answers.

When it comes to road safety, that's where this program excels.

2008 GOALS — FORESTRY TRUCKSAFE

Driving hard for road safety this year, we intend to:

- > Work with the forest sector on implementation of the new provincial Resource Roads Act and WorkSafeBC resource road safety practices.
- > Support introduction of SAFE Companies individual owner operator certification as it affects truckers.
- > Continue working with industry partners on log trucker certification and Class 1 driver's license upgrading.
- > Maintain an active role in standards development for resource roads and steep slope log hauling.

More on SAFE Companies is online at [www.bforestsafesafe.org/program-safeco-index.htm](http://www.beforestsafesafe.org/program-safeco-index.htm).

WHAT PEOPLE SAY

"I wonder where we would be without TruckSafe and your tireless efforts to bring us all home safely at the end of our work day in the woods."

— DENNIS RUTTAN, VANCOUVER ISLAND LOG HAULER

"MaryAnne Arcand and the TruckSafe initiative have broken new ground in fostering awareness of the important role that truck drivers play in creating a culture of health and safety on northern roads."

— DR. DAVID BOWERING, CHIEF MEDICAL OFFICER, NORTHERN HEALTH

Safety awareness grows

SAFE COMPANIES 2007

The Council's flagship program works with the forest sector to improve the safety culture in harvesting and help employers meet industry safety standards and earn SAFE certification from the Council.

Still in its infancy at the start of 2007, with 16 companies SAFE-certified, the program grew dramatically through 2008. By year-end, it had taken hold in forestry operations across the province, with:

- > 456 small and large companies SAFE Certified and eligible for five-per-cent rebates on their 2007 WorkSafeBC premiums
- > 2,752 registrations in place from employers of all sizes

To help program participants become certified, we maintain one-on-one communication, offer coaching for individual employers and conduct regional, user-friendly information workshops.

Last year, the Council took these actions to help smooth the certification process:

- > Hiring six seasoned forestry and safety professionals as safety advocates, to work with and give free advice on their safety programs to small employers across the province.
- > Training 31 external auditors to be qualified consultants who review and conduct safety audits for large companies to qualify for certification.
- > Creating new online resources — a detailed guide that clarifies requirements of the Small Employers Base

(SEBASE) audit for small companies and an electronic newsletter called *SAFE Companies Update* with more than 3,000 subscribers.

2008 GOALS — SAFE COMPANIES

Besides sustaining the growth of the program's first year, we intend to improve it by:

- > Implementing the certification process for individual owner operators, working to make sure that their particular needs are met.
- > Enhancing the program's value to the sector with better accountability, more safety resources and good customer service.
- > Expanding communication and outreach activities to registered employers.
- > Continuing to make program and policy adjustments to achieve ongoing improvement of SAFE Companies.
- > Working with the sector to minimize costs incurred by companies seeking certification

More on SAFE Companies is online at www.bcforestsafec.org/program-safeco-index.htm.

SAFE COMPANIES REGISTRANTS, 2007	TARGET	ACTUAL
Individual Owner Operators	1,042	1,081
Small Companies	1,196	1,409
Large Companies	200	262

WHAT PEOPLE SAY

"One of the main things we have to offer to our employees is a safe working environment, and we believe in this program — it's something I think the industry has needed for many years."

— ROB WOOD, PRESIDENT HOLBROOK DYSON LOGGING LTD. CAMPBELL RIVER

"SAFE Companies will raise the bar for all B.C. forestry operations. This province-wide initiative has had a huge impact on our company. Now we involve every employee and contractor in workplace safety."

— OTTO SCHULTE, VICE PRESIDENT COASTAL WOODLANDS, INTERFOR

Well-trained workers are safe

FOREST WORKER DEVELOPMENT 2007

This Council program supports the industry's commitment to develop a labour force that's confident, competent and well-trained.

Last year, more than 2,300 workers completed our training — for new fallers, basic forest supervisors, faller supervisors and small employers, external and internal auditors and safety advocates involved in SAFE Companies.

Along with delivering courses during the year we also:

- > Opened and staffed a Council office and training centre in Nanaimo, and recruited and qualified contract instructors around the province.
- > Piloted and tested course content for many of our program offerings.
- > Established in-house systems to track training participants and coordinated the delivery of training in more than 50 forestry communities.

Last year, we trained hundreds of individuals with varying needs and abilities. As they complete Council courses, each adds to the sum of a whole forest sector work force that functions within and fosters a strengthening culture of safety.

2008 GOALS — WORKER DEVELOPMENT

As our training program continues to mature and expand this year, we intend to:

- > Continue meeting the needs of SAFE Companies as that program grows, including a training initiative for individual owner operators.
- > Undertake faller certification renewal and re-evaluation.
- > Pilot a certification process for faller supervisors (bullbuckers).
- > Identify training gaps in B.C. forestry and, with input from the Council's training committee, determine priorities for education and training.
- > Expand training partnerships with groups such as colleges, forestry communities, First Nations and provincial and federal bodies.

More on Forest Worker Development is online at www.bcforestsafe.org/program-fallers-index.htm.

SAFE COMPANIES TRAINING PARTICIPANTS, 2007	TARGET	ACTUAL
Small employer health and safety course	1,200	1,598
Internal auditor training	100*	33
External auditor training	30	27

*This is a two-year target through 2008, when most large companies will first require internal auditors.

WORKER TRAINING PARTICIPANTS, 2007	TARGET	ACTUAL
Basic Forest Supervisor Training	500	502
Faller Supervisor Training	100	129
New Faller Training	60	57

WHAT PEOPLE SAY

"There has never been an established standard for supervisor training in the forestry industry. Now there is one, and the faller supervisor endorsement is also excellent and highly recommended."

— PARTICIPANT IN BASIC SUPERVISOR TRAINING, COURSE EVALUATION

"We want to ensure that our crew has the information that will make them safer out in the bush."

— GAI KLASSEN, PINE RIDGE HOLDINGS LTD., BURNS LAKE

Supporting safety

OTHER WORK 2007

Complementing our major programs, the Council does a lot more to achieve its ultimate goal of no fatalities or serious injuries in B.C. forestry. Here are key examples from 2007.

Measuring up

A new system to measure forest safety performance was developed last year to gauge progress on:

- > Reducing fatalities, injuries and costs
- > Fostering positive cultural change around safety
- > Developing competent and confident workers and employers

Getting facts...sharing them

We reached data access agreements with WorkSafeBC, acquired an external injury statistics reporting system and worked with the B.C. Ministry of Forests and Range to improve information on safety in the sector. We also upgraded and expanded distribution of our safety alerts.

Forest Safety Ombudsman

The independent ombudsman appointed by the Council collected forestry stakeholder input from 20 communities across B.C. and produced a comprehensive review of resource road safety for release in early 2008. He was also involved in 38 cases and produced material on forest safety for provincial news and industry media.

More on SAFE Companies is online at www.bcforestsafe.org/nav-ombud.html

Strategic communications

We shifted from reacting to forestry deaths and injuries toward proactive messages about industry investing in efforts to improve safety. Council campaigns, news releases, articles in industry magazines and speaking engagements in forestry communities helped raise awareness of the sector's safety needs.

2008 GOALS — BEYOND CORE PROGRAMS

We intend this year to:

- > Integrate safety information from new sources into our existing systems.
- > Review the ombudsman's office to assure it continues providing value as the sector moves forward.
- > Improve our proactive communication of strong safety messages and useful information to targeted audiences.
- > Address three areas recognized as carrying critical implications for the future:
 - > Adding the wood products manufacturing sector to the Council.
 - > Convening a working group to recommend plans to improve forest workers' health and wellness.
 - > Consulting employers of all sizes on better incident reporting.

WHAT PEOPLE SAY

"The Safety Council, ministry staff and BC Timber Sales are working hard to protect forest workers and ensure they get home safely. I commend your dedication."

— RICH COLEMAN, BC. MINISTER OF FORESTS AND RANGE

"The Council has been key to the pattern of improvement in forestry safety. It is important to ensure that safety remains a focus as the industry faces economic pressures."

— DIANA MILES, WORKSAFEBC VICE PRESIDENT
WORKER AND EMPLOYER SERVICES

BC Forest Safety Council

Mission Statement

The Council's mission is to eliminate all fatalities and serious injuries in the forest sector of British Columbia. We accomplish this by focusing on the following strategic priorities:

- > Promoting cultural change to ensure that safety is treated as an over-riding priority and a shared responsibility;
- > Promoting a safety conscious legal regime in which the laws, regulations and compliance programs encourage and support safety;
- > Developing a competent and confident workforce where workers are well-trained, well-supervised and will refuse to work unsafely;
- > Encouraging companies to have in place functioning safety programs and policies that meet and exceed all regulatory requirements.

Despite the forest sector's inherent dangers, we do not accept that any of our workers should die or suffer life-altering injuries on the job.

Our mission tells everyone in the industry, and all we deal with, that our over-riding priority is for all workers to go home safely to their family and friends every day. "Over-riding" means that no other priority comes ahead of safety — not production, not profit, not environmental protection.

Worker and worksite safety comes first.
