

## **TAG Objective:** **Overweights**

**All Log trucks delivering to the licencees mills will be subject to an overweight policy.**

**Purpose:** to endorse safe hauling practices, reduce the total number of overloads, minimize the potential damage to roads and infrastructure and provide no financial benefits from hauling overweights.

**Practice:**

1. Track and report on Legal axle weights for each truck type. Legal weights based on CVSE regulation.
2. When necessary, develop and implement reasonable weight tolerances based on area of operation, season and configuration.
3. Develop deduction and penalty mechanism for overweights.
4. Develop a hard compliance target for overweights, monitor/report on overall compliance and develop strategies to achieve and maintain target.
5. Compliance summaries prepared and reviewed for all trucks on a semi-annual or annual basis.
6. Cooperatively work with the CVSE, RCMP and other regulatory agencies to share truck compliance results upon request and to improve relationships related to industry practices and regulatory requirements.
